

Echo®

The Ultimate Economic Hard Drive Duplication System

Designed specifically for the technician's workbench or field kit, the Echo is Logicube's most affordable hard drive duplication solution. Fast, easy, and simple, the Echo® is the industry's most portable cloning solution. Copies any IDE, EIDE, or Ultra DMA drive.

Product Features:

- **Hard-drive duplication** - Single target, IDE hard-drive
- **Data Transfer Rate** - Speeds exceeding 550MB/min thru IDE interact. (Optional CloneCard for PCMCIA/Notebook cloning.)
- **Brand unimportant** - Master & target drives can be of different sizes, brands & models.
- **CleverClone™ technology** - Supports intelligent cloning of FAT 16/32, NTFS 4.0/5
- **Compaq diagnostics** - Supports diagnostics partition
- **Free Software Updates** - Easy to upgrade software via the web, uploaded through a parallel port cable.
- **Verify On or Off** - Turn verify "On" to test for bad sectors on target drive
- **Clones All Operating Systems** - Select among several lines of cloning
- **CleverCopy™** - Automatically scales all partitions to fully fit target drives. Copies data only if partition is FAT16/32 or NTFS. Adjusts all necessary target drive structures to ensure target will boot (e.g. Windows 95/98/2000/NT/ME/XP)
- **Mirror Copy** - A simple sector by sector copying (e.g. Mac, Sun, Unix, Linux)
- **LBA/Large Cylinder/Head Translation** Determine partition table head translation depending on BIOS type of target PC

Connectivity Options: Direct to Drive or Thru PMMCIA Slot (optional)

Specifications:

Power Requirements:
90-230 47/63 Hz

Power Consumption:
10W without drives

Operating Temperature:
5 - 60°C

Relative Humidity:
10% - 80%

Net Weight:

8 oz. - 227 grams

Dimensions:

3.8" W x 0.7" D x 6" H

Agency Approvals:

UL 1950, FCC Part
15 Class A, CE
